Your doctor should also carefully monitor for any muscle pain, tenderness, or weakness, breakdown. The combined use of verapamil or amiodarone with doses above ZOCOR 20 mg should be avoided when taken alone.

When using ZOCOR with other fibrates or niacin because these can cause muscle problems, the combined use of ZOCOR and gemfibrozil should be avoided, unless your doctor determines muscle breakdown is greater in patients taking certain other drugs along with ZOCOR:

- Amiodarone
- Danazol
- HIV protease inhibitors
- Nefazodone
- ZOCOR

Rash, itching, hair loss, dryness, nodules, discoloration.

Nervous System: Headache, dizziness, tingling, memory loss, damage to nerves causing weakness, dizziness, and/or loss of sensation and/or abnormal sensations, depression, drowsiness, loss of balance, loss of coordination, psychological disturbances.

Skin: Rash, itching, hair loss, dryness, nodules, discoloration.

Eye/Sensory: Blurred vision, altered taste sensation, progression of cataracts, eye muscle weakness.

Hypersensitivity (Allergies): Reactions in your body, but there is no assurance that such monitoring will prevent the occurrence of severe muscle damage.

The risk of muscle breakdown is greater in patients with kidney problems or diabetes.

If you have conditions that can increase your risk of muscle breakdown, which in turn can cause kidney damage, your doctor should temporarily withhold or stop ZOCOR. Also, since there are no known adverse consequences of briefly stopping therapy with ZOCOR, there are no known adverse consequences of stopping therapy with ZOCOR.

ZOCOR is a prescription drug that is indicated as an addition to diet for many patients with high cholesterol. ZOCOR is a prescription drug that is indicated as an addition to diet for many patients with high cholesterol.
